

PARENTING IN THE DIGITAL AGE

Educating parents about the
digital world of children.

Strategies to reduce conflict
around digital issues.

Ofer Zur, Ph.D.

Thursday, September 22, 2011

Lecture: 6:30-8:30 pm

Presentation School Library
open to all with no admission fee

This presentation is geared to parents, teachers and community members. It will help parents learn about the digital world of children, their attraction to facebook, twitter and texting and will propose effective parenting strategies for the digitally savvy child. The guidelines to parents are aimed to reduce conflict and tension and increase harmony and collaboration in the home around digital issues.

Dr Zur is a consultant, licensed psychologist, writer, teacher, and lecturer from Sonoma, CA. His recent focus has been on the psychology of the web and how modern digital technologies are affecting our families, relationships, schools, workplace and society at large.
